

STEFAN PIERCE KUHL

Director of Technology & Project Management
Minneapolis, Minnesota

SUMMARY

My path into IT leadership started with solving problems for organizations that needed things to work. A decade later, that's still the job: translate what an organization actually needs into infrastructure that holds up. I've led CRM migrations, cloud transitions, and custom builds supporting 6,000+ users a year, and I have a habit of cutting IT costs while I'm at it – over 50% at my current org.

WORK EXPERIENCE

DIRECTOR OF TECHNOLOGY & PROJECT MANAGEMENT, YOUTHWORKS (REAL RESOURCES) – 2017-PRESENT

- Partner directly with senior leadership to set IT strategy and budget accountability, planning and leading cross-departmental projects org-wide.
- Own Microsoft Dynamics 365 CRM end-to-end for 30+ users – data integrity, security, website integration, and workflow design that turns complex processes into simple staff experiences.
- Lead a team of IT contractors and vendors spanning web development, website management, and digital marketing.
- Lead org-wide IT infrastructure and cybersecurity, including a full cloud migration and oversight of all web development – including a custom-built registration system processing 6,000+ users annually.
- Manage a \$250K+ multi-department budget, cutting annual IT spend by over 50% by transitioning away from a managed service provider (MSP).

BUSINESS ANALYST, BETHEL UNIVERSITY – 2017

- Served as liaison between department stakeholders and IT, gathering requirements and recommending process improvements for evolving organizational needs.
- Delivered consistent stakeholder communication, identifying process bottlenecks and driving efficient, data-informed resolutions.

APPLICATION INTEGRATION SPECIALIST, BETHEL UNIVERSITY – 2014-2017

- Led university-wide application implementations, managing scope, timeline, and budget across multiple concurrent projects.
- Integrated applications into a complex technical environment, ensuring system stability and cross-team communication with infrastructure stakeholders.
- Supported and maintained 150+ applications across Unix and Windows environments, including Apache Tomcat and IIS web servers, with database integration across SQL and Oracle.

PREVIOUS EXPERIENCE

DESKTOP/LAN SPECIALIST, BETHEL UNIVERSITY – 2012-2014

PROJECT SPECIALIST, BETHEL UNIVERSITY – 2011-2012

EDUCATION & CERTIFICATIONS

Certified Professional Project Manager

St. Thomas University, 2016

Bachelor of Arts, Reconciliation Studies

Bachelor of Arts, Youth Ministry

Bethel University

KEY PROJECTS

- Led development of a custom web application for release forms and waivers, supporting 6,000+ trip participants annually – designed for usability while ensuring HIPAA-compliant handling of confidential user data.
- Migrated Dynamics CRM 2013 (on-premise) to Dynamics 365 Cloud across all business units – 50,000+ contacts and 100+ internal users, with full data mapping across Contacts, Leads, Orders, Products, and custom entities critical to organizational workflows.
- Led migration of 10,000+ university user accounts from on-premise Microsoft Exchange to Google Workspace, including all associated emails, contacts, and calendars.
- Project managed the organization's annual theme curriculum – guided daily journals, visual identity, and integrated video content for 6,000+ summer participants – coordinating writers, designers, developers, and video production teams.
- Leading the organization's full rebrand (in progress), including an updated vision statement, new visual identity, and website built from the ground up.
